KATANA™ Zirconia Block

Compatible With Block Scanner for CEREC Primemill™

Automatically Scans The Zirconia Block

In order to support the block scanner system introduced in the new CEREC Primemill™ system sold by Dentsply Sirona, the traditional two-dimensional barcode has been replaced by a data matrix code.

Details

Previous   New

Existing CEREC users who own MC series units (prior to Primemill) can utilize the new data matrix code to initiate the touch process.

There will be **a seven alphanumeric code displayed** on each block. This will resolve **previous "Quality Label Error" codes which required entering a space after only six characters.**

The printed side of the bar code has been changed to reflect the new data matrix code.

The printed side of the KATANA™ logo remains unchanged.

• Before using this product, be sure to read the Instructions for Use supplied with the product.
• The specifications and appearance of the product are subject to change without notice.
• Printed color can be slightly different from actual color.
